WHO WE ARE

We are a team of creative technologists driven by a mission to transform global staffing and hiring with incomparable connection, collaboration, and compassion.

WHAT WE DO

Our patented core-level platform technology connects worldwide Staffing Agencies, Employers, Universities, and Professionals to build active private business networks. Over these personalized networks, they can seamlessly connect, collaborate and accelerate the hiring process.

WHY WE DO IT

The global staffing and hiring industry has been fragmented for so long that Agencies, Employers, Universities, and Professionals are still using unsophisticated, decades-old email technology for day-to-day interaction and hiring workflow management. Peozzle's core-level platform integration technology accelerates the hiring process and helps turn candidates into employees in a matter of days, not months.

WE ARE UNIQUE

While current staffing and hiring solutions exist in a siloed environment, Peozzle's seamless, automated platform technology introduces a new level of connection, sophistication, and simplicity. Now, agencies can supply qualified professionals from across the globe, employers can fill open positions in hours, not days, and professionals can enjoy the luxury of working from almost everywhere.

OUR PRODUCTS
